## PROFESSIONAL SUMMARY

Information Technology Graduate (BSIT 2022–2026) ranked in the **Top 15% (84.6th percentile) nationally** among 33,000+ graduates in the HEC/MoITT National Skill Competency Test. Achieved a **96% academic benchmark in Cybersecurity**. Experienced in SOC Operations utilizing Wazuh SIEM for threat telemetry, while actively engaged in offensive security labs (TryHackMe, HackTheBox). Uniquely positioned at the intersection of security and engineering, building production-grade MERN architectures with rigorous OWASP Top 10 mitigation strategies—demonstrating application security expertise at the code level, not just in theory.

## TECHNICAL EXPERTISE

|                        |                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------|
| Security Operations    | Wazuh SIEM, Log Analysis, Endpoint Monitoring, Threat Detection, Network Segmentation, Alert Triage    |
| Application Security   | OWASP Top 10, NoSQLi Prevention, XSS Mitigation, HTTP Parameter Pollution, Rate Limiting, Helmet, CORS |
| Auth & Access Control  | Stateless JWT (HTTP-only cookies), bcrypt Password Hashing, Role-Based Access Control (RBAC)           |
| Network Defense        | TCP/IP, DNS, DHCP, Subnetting, Routing Protocols, OSI Model, Cisco Packet Tracer, SSL/TLS Hardening    |
| Web Architecture       | MERN Stack (MongoDB, Express.js, React.js, Node.js), TypeScript, REST APIs, WebSockets, Tailwind CSS   |
| Infrastructure & Tools | Git, GitHub, Linux, MongoDB Atlas, Vercel, Cloudinary CDN, Turborepo Monorepos                         |

## PROFESSIONAL EXPERIENCE

### SOC Analyst Intern

Tech Hierarchy | Remote

- Utilized **Wazuh SIEM** to aggregate endpoint logs, monitor security events, and correlate anomalies across managed network infrastructure, significantly improving threat visibility.
- Designed and simulated network segmentation using **Cisco Packet Tracer**, applying strict subnetting and isolation principles to restrict lateral movement between sensitive network segments.
- Conducted SOC simulation exercises via TryHackMe, developing practical skills in **network traffic analysis, incident triage, and response procedure documentation**.
- Applied endpoint protection methodologies and active defense strategies to strengthen threat identification workflows.

MAR 2026 – APR 2026

FLAGSHIP ENGINEERING PROJECTS

MedicalLink HMS

ACTIVE DEVELOPMENT

JUN 2026 – PRESENT

TypeScript, MERN Stack, Turborepo, WebSockets • [View Repository](#)

- Engineered **multi-tenant schema-level data isolation**, ensuring zero cross-contamination between hospital organizations to meet strict healthcare compliance requirements.
- Implemented rigorous **RBAC across 5 distinct permission tiers** (Admin, Doctor, Nurse, Receptionist, Patient) coupled with Zod schema validation on all API endpoints.
- Configured a zero-trust production security stack: **Helmet security headers, strict CORS enforcement, and JWT authentication** leveraging secure, HTTP-only cookies.

TourMate Malakand

PRODUCTION

SEP 2025 – MAR 2026

React.js, Node.js, Express.js, MongoDB, Mapbox GL • [View Repository](#)

- Implemented a comprehensive **OWASP Top 10 mitigation stack**, including NoSQL injection prevention via `express-mongo-sanitize`, aggressive XSS sanitization, and HPP normalization.
- Secured identity management with **bcrypt password hashing and HTTP-only JWTs**, resulting in zero plaintext credential exposure.
- Engineered a custom **node-cache proxy for the OpenWeatherMap API**, reducing response latency by over **99% (from 1,150ms to 7ms)** for concurrent production queries.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Information Technology

University of Malakand | Sep 2022 – Sep 2026

Grade: A+ (96% in Cybersecurity)

Focus: InfoSec, Computer Networks, AI.

Additional: Enrolled in KPITB Blockchain Technology Program.

Top 15% Nationwide — NSCT

HEC, MoITT, P@SHA, PSEB | Apr 2026

Scored in the 84.6th percentile out of 33,000+ computing graduates across 10 core technical domains.

Master Computer Networking

Scaler Topics | Sep 2025

Comprehensive mastery of TCP/IP, DNS, DHCP, OSI Model, Subnetting, Routing protocols, and Network Security architecture.

Full-Stack Web Development

Apna College (Delta) | 2024

Rigorous training in modern frontend and backend development paradigms utilizing the MERN stack.
